Aliframe Marquee

Marquee Description

Aliframe Marquees are designed to a Clearspan Frame system. Framework used is anodised, aluminium profile with galvanised steel connectors. Roof and walls panels are kedged at their edges. The keder or beading feeds along channels on the aluminium framework.

Aliframe Marquees are offered as a 'Flexiframe' option. Flexiframe system introduces an extension knuckle into the framework's portal beam. This allows a variety of spans, whilst using a combination of short Roof Beams.

Options

Aliframe Marquees are available in:

- 6m, 9m or 12m span
- With optional bay sections of 3m, or 4.5m
- Gable Ended design. Alternative Roof designs are available on request

Apex Height

The apex height of the Marquee dependant on span:

- 6m span is 3.4m
- 9m span is 3.9m
- 12m span is 4.6m

Eave Height

Eave Height is 2.4m.

Fabrics

We offer Aliframe Marquees in:

- Smooth PVC – Valmex, 650 gsm, or nearest equivalent specification sheets can be supplied for each material
