

Perfect Way to Use the Garden!

Ideal for:

- Party Venues, Hotels, Pubs, Restaurants, Cafes
- Private houses, nursing homes

Bring the outside inside!

Extend into the garden with a Modular Framed Awning or Marquee Pergola. Weatherproof, fire retardant fabrics are used to create an enclosed space for living, entertaining and relaxing.

Key Features

Flexible – made to fit your space economically and easily.

Robust – using materials that are standard to the events industry to create a long lasting structure.

Easy – based on clear span frame marquee design principles, these structures are easy to install, de-rig and maintain.

GARDEN ROOMS

Product Specification

We offer 2 Product options:

Modular Framed Awning – complete solution that can be built out from your building creating a ‘lean-to’ structure. This is available in aluminium framework only. Aluminium keder rail and brackets must be secured to building. Structural stability of building is client’s responsibility.

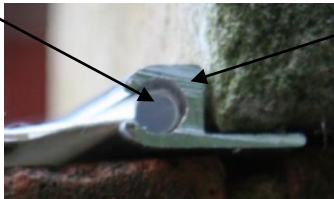

OR

Marquee Pergola – collaborative solution. Client provides the timber framework or pergola, we make the roof and wall fabrics to suit. Fabrics have a beading or keder that are fitted to the framework via aluminium keder rail. This results on a water or air tight finish.

Both solutions are supplied with ground rail system to weight and pin down the walls. Windows (range of styles available) can be added into the walls. All wall fabrics are zipped, so the whole panel can be rolled up easily to create an opening. If a smaller doorway is required, additional zips and side push buckles can be incorporated.

Keder or ‘beading

RAISING INDUSTRY
STANDARDS SINCE 1919

Step 1 – Initial Estimate

We can work with you to understand your requirements and appraise your site.

Send us a photo and dimensioned sketch for your proposed Garden Room. We can assess the suitability of your site and discuss the aesthetics you wish to achieve too.

We look at roof drainage to ensure a fabric roof has sufficient pitch. Low pitched fabric roofs can pond causing possible water leakage or structural failure.

We offer a wide range of fabrics for roof and walls. Samples are posted on request.

BEFORE

AFTER

Step 2 – Outline Design

Once the structure's outline design and specification has been determined, we can prepare a quotation along with an outline design drawing. If you wish to proceed on this basis we will raise a sales acknowledgement and deposit invoice prior to production commencing.

Step 3 – Detailed Design and Production

When preparing our manufacturing drawings we may ask you for additional information. For example if we are creating fabrics to fit to a timber frame or pergola. If this is the case, we will create a detailed design drawing for approval before continuing with manufacturing.

Step 4 – Installation and Method Statements

We can prepare a method statement to aid installation of your Garden Room. If you require installation, we can recommend Marquee Hire clients who are local to you. Fabric care instructions are available to download from our website or emailed on request.
